

As an aquarium planter,
**Hypot is dreaming of an
increasingly
happy world**

“Put nature next to your computer.”
“Put a piece of nature in your space.”

Take care of all your plants and fish together

- You will be able to watch not only the water plants grow, but also all your plants together, along with your fish.

Easy to Take Care of

- No need to water the plants
- Easily feed your fish and give your plants their nutrients through the 3 holes
- Thanks to the development of a filter for small-sized fish tanks, the cleaning cycle has been extended more than 2 months.

Diverse Power Usage

- A low-noise USB bubble generator has been developed, allowing to use it with your computer USB as well as a 200V power supply.

Outstanding Humidification

- A strong humidifier that runs through 3 holes

Feeding

1

Fish tank development: 3 feeding holes

Watch not only your water plants grow, but all your plants, together with your fish!

- 1) Fish food, new water, and nutrients can be supplied through the 3 holes
- 2) The 3 holes allow moisture within the fish bowl to escape, creating strong a humidification effect.

2

A filter at the bottom, made just for small-sized tanks

Fish tank care made easy through the development of a small bottom filter

- 1) Thanks to the development of a filter for small-sized fish tanks, the cleaning cycle has been extended more than 2 months.
- 2) Sponge Filter, Ayr Stone, Air Hose Included

3

A low-noise USB bubble generator

Fish tank care made easy through the development of a small bottom filter

- 1) USB Power Supply Usage
- 2) 200V power supply usage if using a USB charger
- 3) Low-noise
