

Oxygen mask

FEATURES

Oxygen Masks are a clear, elongated adult oxygen mask used to supply therapeutic oxygen to a person with a respiratory illness. The medium concentration mask is made with soft, latex free vinyl material that is comfortable on the nose and mouth. Adjustable nose clip assures comfortable fit and allow for repositioning.

- Soft, vinyl material
- Size : Large, Medium, Small
- Comfortable
- Adjustable nose clip
- Latex free

SPECIFICATIONS

Sizes : Adult / Child / Infant

Disposable Nasal Oxygen Cannula

The nasal cannula is designed to provide a lower concentration of oxygen and is the most appropriate initial oxygen device for chronic obstructive pulmonary disease (COPD).

Nasal Cannula Description and Use

The nasal cannula is the most appropriate initial oxygen device for COPD patients because it provides a very limited oxygen concentration. This device may also be used on patients who are not able to tolerate a non-rebreather mask.

The nasal cannula consists of two soft plastic tips, known as nasal prongs. The nasal prongs are part of the thin tubing which leads to a main [larger] tube line that connects to the oxygen source.

Connect the end of the tubing to the regulator and set the appropriate liter flow rate at no less than 1 LPM and no greater than 6 LPM. The delivered oxygen concentration ranges from 24 to 44 percent.

The nasal prongs are inserted into the patient's nostrils with the tab facing down. Position the tubing over and behind each ear, sliding the adjuster to secure underneath the patient's chin. If the nasal cannula supplied has an elastic strap, secure the strap comfortably behind the patient's head.

Disposable SpO2 Sensor

Compatible with major patient monitor brands

Nellcor
Ohmeda
Philips
Marquette
Spacelabs
Novamatrix
Criticare
BCI
Datascope
Datex
Nihon Kohden
Palco

Suction Catheter (PVC)

FEATURES

Manufactured from medical grade virgin quality non – toxic, non irritant PVC.
The Tubes are highly flexible yet have a suitable degree of softness
and the surface is finely embossed to enable smooth insertion.
The distal end opening and side eyes are smoothly contoured and free of sharp edges.

SPECIFICATIONS

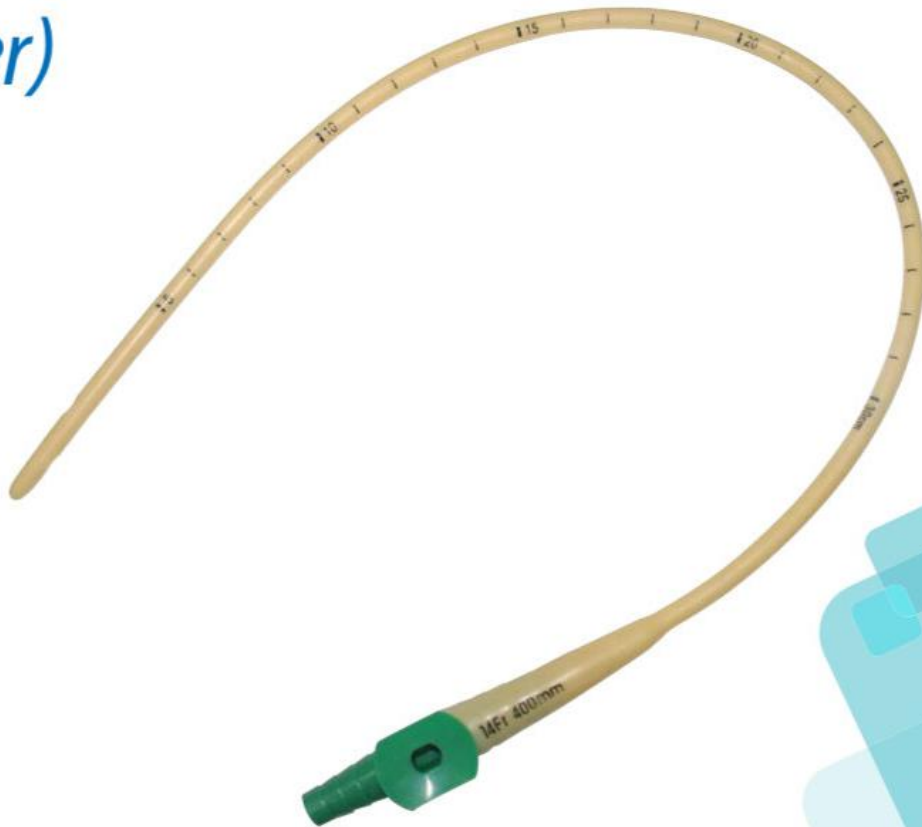

Sizes : FR 6, 8, 10, 12, 14, 16, 18, 20, 22 with 50cm Length.
Colours Coded luer for easy size identification.

CONNECTER STYLE

Size - FR	Color	
6	Light Green	
8	Blue	
10	Black	
12	White	
14	Green	
16	Orange	
18	Red	
20	Yellow	
22	Violet	

Suction Catheter (Rubber)

FEATURES

- For removal of secretion from trachea and bronchial tube
- Atraumatic, soft and rounded open tip with two lateral eyes
- Soft, frosted and kink resistant Nelaton tubing
- Colour coded connector for easy identification of size
- Extra smooth low friction surface tubing facilitates easy intubation

SPECIFICATIONS

Sizes : FR 6, 8, 10, 12, 14, 16, 18, 20, 22, 24 with 425mm Length.
Colours Coded luer for easy size identification.

Anaesthesia Breathing system

Single-limb design

Our single-limb circuits provide gas delivery, heat retention and a circle breathing system.

Deadspace			
Limb-O	Plain	Patient connector	14.0 mL
	Gas sampling	Patient connector	12.5 mL
	Gas sampling	Bifurcated	20.0 mL

Specification - Limb-O Breathing Circuits

- Flexible shape and positioning reduces torque on the endotracheal tube
- Corrugated tubing and septal wall: Polyethylene/Ethylene Vinyl Acetate (EVA)
- 22 mm connectors: Polypropylene
- Cuff band: Polyisoprene
- Expandable extension hose: Polypropylene
- Thermally efficient: Net increase of 6.2 °C in the first 15 minutes at 4 L/min flow rates on anesthesia machine
- Intended for patients weighing greater or equal to 4.5 kg
- Not made with natural rubber latex
